

You have censured almost everything now days. If you do not keep the unwanted phone calls from coming to my house and everyone else's then you have problems. Indiana has a good thing going. I do not get phone calls that i do not want. If i want to contact some business, i do so and then give them my number to call me. THink of this. Do you want me call you all the time at all times and bugging you. Think about it. Keep them from bothering me when i am minding my own business.
